Idris Khattak

Applied AI Master's Student

Applied AI master's student at OsloMet with four years of computer vision experience and a growing focus on language models, retrieval pipelines, and evaluation. I build the systems around models and measure what the results actually support.

EDUCATION

Master's in Applied Artificial Intelligence

Oslo Metropolitan University · Oslo

Aug 2026 — Present

Advanced study in machine learning, intelligent systems, and practical AI, with an emphasis on engineering and research foundations.

BS Artificial Intelligence

Hazara University Mansehra · Pakistan

2020 — 2024

Coursework across machine learning, computer vision, and digital image processing. Final-year project: people counting and attribute estimation from video.

AI Programming with Python Nanodegree

Udacity · AWS-sponsored scholarship

Jun — Sep 2023

SELECTED PROJECTS

Improving my LLM-RAG assistant

FastAPI · FAISS · all-MiniLM-L6-v2 · Groq

Production-minded RAG pipeline that searches structured Markdown knowledge and uses gpt-oss-20b to generate grounded answers without exposing private credentials.

Fine-tuning Llama 2 for university Q&A

QLoRA · Hugging Face · PEFT · TRL

Fine-tuned Llama-2-7b-chat in 4-bit NF4 on 41 hand-written admissions pairs. The study found that the small dataset changed tone and format, but did not add reliable knowledge.

Human Insight AI

Flask · OpenCV · YOLO

Video interface for five detectors using one consistent prediction shape behind a streaming pipeline.

Fingerprint reconstruction from partial images

PyTorch · OpenCV · GANs

GAN trained on SOCOFing; achieved average SSIM 0.64 across two runs.

Human counting and ethnicity detection

YOLOv8 · OpenCV · DeepFace

Final-year project using tracking and line-crossing counts; documented why the ethnicity-detection component should not be deployed.

EXPERIENCE

Freelance and self-directed AI work

Pakistan

2024 — 2026

Worked across AI projects spanning computer vision, language models, and data workflows.
Helped Loomlan improve Shopify store design and build web-scraping workflows.
Built and evaluated end-to-end prototypes rather than focusing only on model training.

SKILLS

Programming & Data: Python, Pandas, NumPy, scikit-learn

Deep Learning: PyTorch, Hugging Face Transformers

LLMs & Generative AI: RAG, QLoRA, PEFT, TRL, Embeddings, FAISS

Computer Vision: YOLOv8, OpenCV, MediaPipe, DeepFace

Backend & Tools: FastAPI, Flask, REST APIs, Git, GitHub, Jupyter

Cloud: AWS SageMaker

Core Areas: Machine Learning, Deep Learning, Computer Vision, LLMs, Generative AI, Data Analysis

CERTIFICATES

PyTorch for Deep Learning
Udemy · 2024

Machine Learning with Python · Honors
Coursera · 2023

Applied Data Science Capstone
Coursera · 2023

ADDITIONAL

Languages: English, Urdu, learning Norwegian

Open to: AI, ML, and data internships
